

Datalogic Memor

ShopMate compatible handheld scanner

It's important to keep on top of your stock levels and product details but it's not always easy, especially when your till is required to make these changes.

To make stock control and product management simpler, there's the Datalogic Memor Handheld Scanner, fully compatible with the ShopMate EPoS system and available from The Retail Data Partnership.

ShopMate compatible
handheld scanner

How can the Datalogic Memor help your business?

The Memor features a variety of useful tools that make managing your retail business easier and can save you money.

Direct wholesale ordering:

You can scan products throughout your shop and place an order. You can then choose to update your stock automatically with electronic delivery notes from your wholesaler.

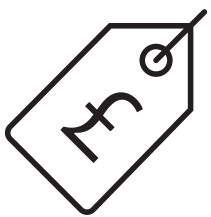

Product management:

Add products to your till and update stock levels. Your Memor can add and modify product details, pack size, cost and RRP. You can even set your own pricing rules.

Stock Control:

The Memor's light but durable body makes it perfect for stock management. Keep it with you around the store and efficiently carry out stock takes, check goods in, returns, damages, out of dates and more.

Shelf Edge Label Generation:

With regular price changes from the wholesaler, it is essential that you keep your SEL's up to date. Your Memor handheld scanner and ShopMate EPOS system can create and print SEL sheets quickly and easily.
